1 Rue Rene Parhard
Paris, X111, France

Dear Michel:

I was so happy to get your most interesting letter and ask pardon for my tardy reply. I have been in the hospital with a blood clot on my lung and then had to go to the University of Hawaii for two weeks. Then Christmas and New Years and I am still trying to get caught up on correspondence. I called the Idaho State University and asked them to send you "Introduction to Flint-working". Hope that you have received it by this date.

On congratulations on your new book and your generous offer to send me a copy. I talked with Bob Butler, the editor of "Tebiwa" and asked him to include a resume of your book in the Spring issue. However, it had already gone to the printers and was too late for this issue. I suggest that you send a resume of your book to Miss Ruthann Knudson, editor of "The Lithic News Letter", Dept. of Anthropology, Washington State University, Pullman, Washington, 99163. It is a publication with a wide circulation to those interested in lithic technology. We wish you every success with your book and know it will be a superb quality publication and a valuable contribution to the profession.

Michel, give our best Jacques and tell him I am still waiting for that promised letter. We wish you and Jacques a prosperous and happy New Year.

With kindest personal regards,

Don E. Crabtree
