Dr. Nicholas J. Del Cioppo  
Dept. of Anthropology  
California State College  
Sonoma, Calif. 94928

Dear Sir:

Please excuse the tardy reply to your letter of April 15th but the past summer has been one of many commitments and obligations.

A list of my publications can be obtained from Dr. Earl Swanson, Idaho State University, the Museum, Pocatello, Idaho 83201. I recommend "An Introduction to Flintknapping" if it is still available.

I heartily encourage you and Mr. Berg to continue your experiments on lithic technology and, in particular, the analysis of breakage in bifacial stone tools. Observations on the fracture of flint-like materials would be a substantial contribution to the profession.

I hope that by the time you receive this letter you are well on your way to resolving many experiments.

With best wishes,

Don E. Crabtree
