

March 18, 1978

Dear Johnny and Hisako,

I am sorry to be so late in answering your letters and card, but it has been a long stint of illness and surgery and I haven't been able to do any correspondence the past year. I did find out yesterday through Doctor Ruthann Knudson that you have changed positions. She unfortunately missed seeing you. I would have liked to have had your making her acquaintance as she is very prominent in the prehistory of Paleo Man of Western America and I have shown her your photographs of some of the materials that you and Milton collected and also told her of the most interesting plaques which, by the way, is of interest because a local doctor by the name of Doctor Shaub found two here in Idaho which are almost duplicates of the ones that you and Milton found.

I did get to talk to Mrs. Delos and she said that they would stop in and see me some time, but I still haven't met them personally. I do think that you should make a trip to Idaho and visit us both.

Your weather should be great for exploring. I will be anxious to learn of your new hours and where you are at this time and if you have a new number and what would be the best time to give you a call.

Will look forward to hearing from you.

Your friend,

Don Crabtree
