

Dear Colette!

Would like to thank you
so very much for the papers on
stone technology. My understand-
-ing is still in the grade school
stage. Yet, I am very much
interested in stone technology.
My work here in the pleyas or
desert valleys is strictly local,
seldom do I brande out, as
any one will do, after much
reading, I have come up
with a number of discoveries,
some interesting to other people
and some probably interesting
only to myself. Having been

a "fan" of yours for some time,
 I was very honored to have
 been able to speak to you
 and would like for you to
 extend my thanks to Jim
 Ayres upon your next meeting.

Now and then I write a
 small article for a local
 column in the "Morning Sun",
 really, only to help out a dear
 friend who runs short of
 material. I am enclosing a
 copy of my most recent. If
 possible would you "pass"
 over it and see what you

can make of the artifacts?
 Naturally, you must remember
 I am a novice and only
 write what to me seems to
 be appropriate, I have never
 sat in a classroom and
 been therein washed by a
 professional archeologist.

Thanks again, and I
 am anxiously awaiting
 a visit from you or very
 visiting you.

Yours sincerely
 Johnny
 Dixon
