Dear Sir:

Pardon the delay in answering your letter of July 21st, but my wife's serious illness has kept me away from home and the university.

Am enclosing herewith copy of Science article which you may not have. I have written many articles for the Idaho State Museum Journal, "Tebiwa", but, unfortunately, most of them are out of print. However, Dr. Earl Swanson is now in the process of having them reissued and they should be available very soon. Also, have written a very long and comprehensive article on the manufacture of "prismatic blades" of Mexico which I am sure you would be interested in, as they were used surgically, as well as for other purposes.

If you will write direct to Dr. Earl Swanson, Idaho State University, The Museum, Pocatello, Idaho 83201 am sure he will send you a zeroxed copy of all the articles and also a reprint of the article on prismatic blades which appeared in American Antiquity. Am sure he still has some copies.

Thank you for your interest in my work and let me know if I can be of further service to you.

Sincerely,

Don E. Crabtree

encl.
