

Dear Evelyn and Don;

Congratulations on the fine article in Tebiwa, analysing the Lindenmeier technology. It is a classic and much needed. Did you send reprints to Bordes and Marie??

A friend of mine has come out with a definitive article on crescents (last issue of Amer. Antiquity). I looked over his collection recently and thought that many or most of the specimens had been made from heat-treated material. I urged him to send them to you to get your opinion on the question. His name is Lewis Tadlock.

If you two are in San Diego this winter, come by and stay with me. I have a spare room. Sold the pad in Brentwood and am looking for a chance to buy or build.

Love to both,

D. King
