

Hi!

Dec. 27

Science has returned our galley prints which I will check and mail out today. Have ordered 200 reprints. How many do you want??

This kind of experimentation is so promising that I plan a small seminar with State College students (4 or 5 at most) next semester to continue doing practical jobs with stone tools.

Are you and Evelyn coming to San Diego this spring? If so, would you be interested in working with the kids and me for a few days? I figure that all we do in this line is a great advance.

Guess what...I have found a FLUTED POINT IN THE MAKING at our M-175 site! First one in the far west. Want you to see it.

Best,

*Davey*
