MR. CLARK C. EVERNHAM, MANAGING DIRECTOR

DR. SPENCER L. ROGERS, SCIENTIFIC DIRECTOR

Dear Don;

How would this grab you...would you come down and work for about two weeks with a picked class of about six grad students and myself, if we can raise funds so that you come with all expenses paid? We'll try to get you an honorarium, too, but don't guarantee.

After getting your letter, I went to see Clark Evernham. He thinks he can get the funds locally...interested private donors, TV etc.

With only 8 of us working, including you and myself, it should be possible to get far more rapport and results than at that mob scene in Calgary. I, too, believe in the small atelier.

PLEASE LET ME KNOW AT ONCE! We'd sure look silly if we got a local donor all turned on and then you and Evvy decided you'd rather stay there in Idaho with your feet in a snow bank!

TIME: Late Feb. This gives us time enuff to make arrangements, get more materials etc.

MATERIALS: all we have is felsite, basalt, and calico ^hcalcedony. How the hell can we get a load of obsidian???? Could you ship at our expense?

Darcy
