

Next day -

Dearest Don -

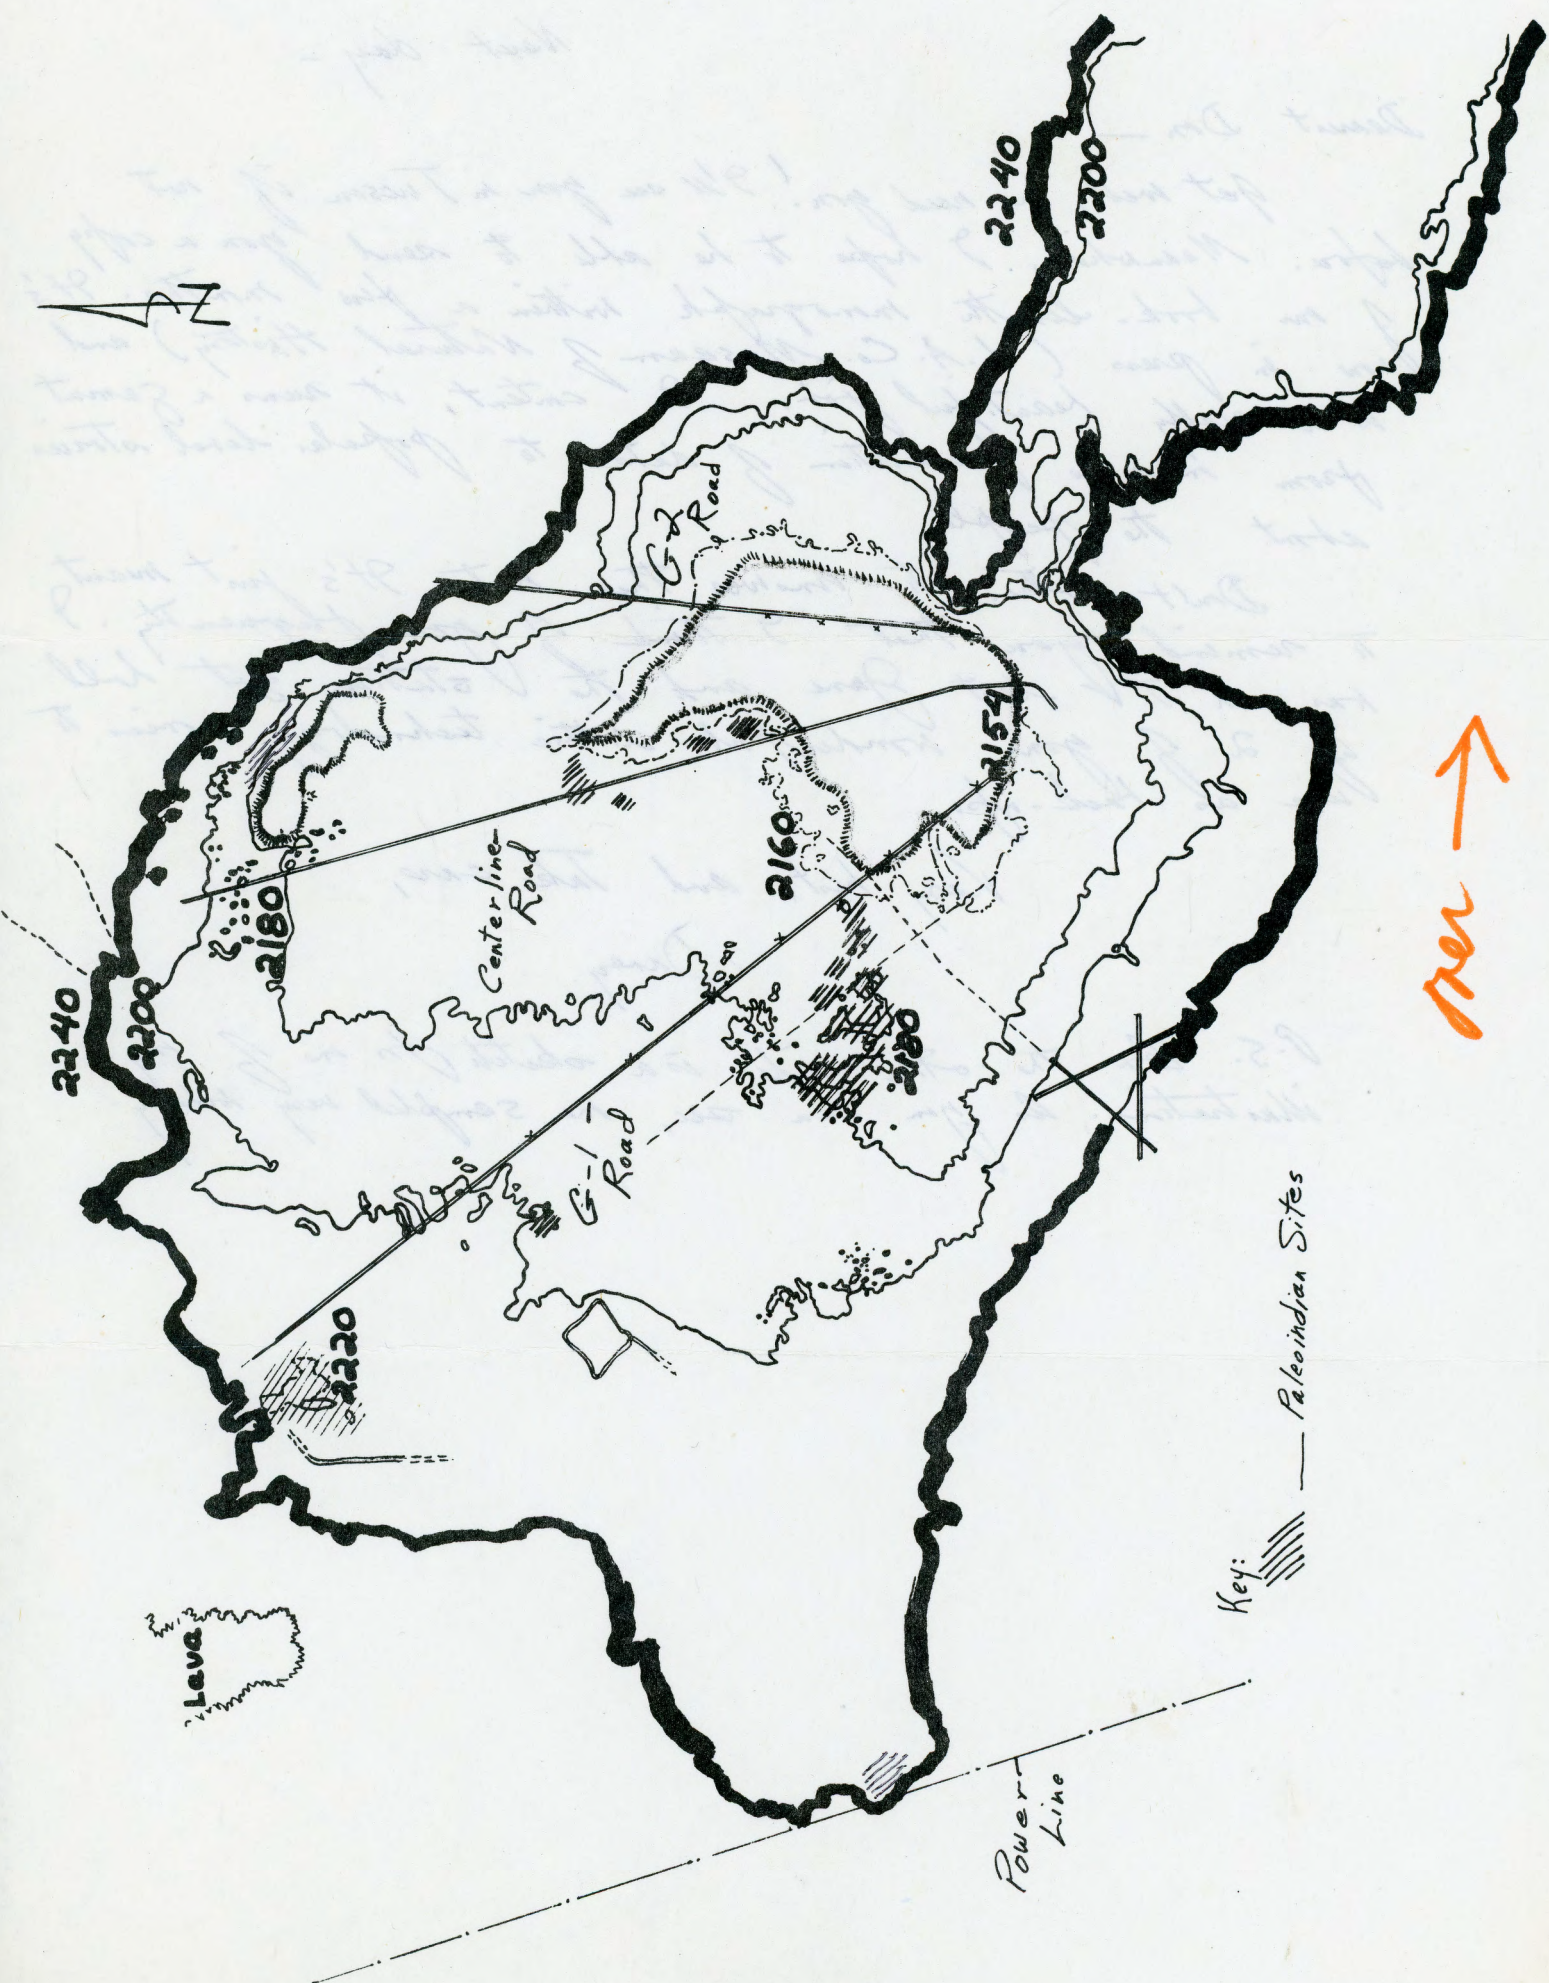

Get well, we need you! I'll see you in Tucson if not before. Meanwhile, I hope to be able to send you a copy of an book-length monograph within a few months. It's now in press (L.A. Co. Museum of Natural History) and is a really beautiful job. In content, it runs a gamut from massive presentation of data to popular level stories about the people.

Don't bother to answer this note. It's just meant to remind you that I think of you frequently. I was on TV last June and the station got hold of 2 of your wonderful little technology movies to use as back-ups.

Very best, and Take care,

Davey.

P.S. On the other side is a sketch for one of my illustrations. As you can see, we sampled very widely.
