Lima, November 11, 1975.

Mr. Don Crabtree  
Kimberley  
Idaho  
U.S.A.

Dear Mr. Crabtree,

Returning to Lima, I found your wonderful paper about the Hohokam points, etc, and come to thank you very very much for this most valuable present. Furthermore, it arrived just in time for me to correct my Essay in taxonomy of *our* stone implement collection; with your permission, I shall quote you, giving your definitions, and I'm subdivising our objects into 4 classes: raw material - blanks - preforms and finished objects.

As I shall <sup>have</sup> no time to review our 20.000 objects, I thought of saying (in this first edition which goes now into press) "probable blank", or "probable preform," not committing myself, a novice.

+ Two  
I'm editing in Geneva (Switzerland) a collection of Papers or "Reports" which shall accept articles finding place in the enclosed organigram. We hope to publish <sup>2</sup> volumes of 250 to 300 pages each year, and have material for 12 volumes. Nevertheless, we consider your papers so important that we would be extremely pleased to accept one of your texts in volume 2 (1976), should you wish to cooperate.

I am also trying to raise the money to buy one of your films, *but with little hope of success*

Hoping for a positive reply, I remain, dear Mr. Crabtree, with renewed thanks.

Faithfully yours,

  
Frederic Engel
