Dear Don:

The Science editing is excellent. The only questions you must answer are those concerning tense, No. 4, 21a, and 25, from the "Check List" from Science. These have to do with whether the Kimberley aborigine are still flaking stone or whether this is something that was done only in the past.

When you finish correcting these and looking over their changes mail this promptly to Science so they can get to press with it.

Yours truly,
