Dr. Paul H. Ezell
San Diego State University
Dept. of Anthropology
San Diego, Calif. 92115

Dear Dr. Ezell:

Thank you for your letter of April 10th requesting a meeting in August to discuss a possible Levallois core.

I will be very happy to meet with you at that time if I am in Idaho. However, my plans for August project my being out of State. I have to be in Forest Grove, Oregon on the 9th of August to receive a \$1500.00 scholarship for my student Bill Statham which is to be presented by the National Federation of Mineral Societies. This means that we will leave Kimberly on about the 6th or 7th of August. After the banquet and presentation, we plan to travel to Vancouver Island and also pay a visit to the Ozette site. Will probably be away from the 6th to the end of August. If you arrive before that date I would certainly be please to visit with you and assess your core.

As an alternative - I do not know if Bill Statham plans to go to Forest Grove and if he does not he will be at the University and will be perfectly capable of assessing the technique of the core. Do be sure and contact him when you are at the University.

Other than that I can only suggest that you send the core to Mr. Bruce Bradley, Southern Methodist University, Dallas, Texas (Dept. of Anthro) and he will be able to define the technique. He is an excellent flintknapper and has worked for several summers with Professor Bordes.

Sorry I can not be more definite at this time but trust we will have an opportunity to meet.

Yours very truly,

Don E. Crabtree
