Hobbs City, Calif.

Hi. Don:

I don't suppose you even expected to hear from any of the people you meet on your vacation; but this time you got a surprise. I am the rock hound (camped beside you at the KOA Campgrounds in Bend Oregon) with the Carnelian.

I was writing in regard to your rock collection you mentioned but I forgot the particulars and I may have met another rock hound who might be interested.

How much did you have

total and what variety and what was the price!

He lives near me here and doesn't have too much room but he wanted me to ask you if he bought all of it would he have to move all the rock right away or could he move in about two or three different trips.

How was your trip home? We stayed there three days, I went out east of Trineville to Mawry Mt. but the stuff was all picked over, I got about 100# mixed moss (yellow, red and green) small stuff (30x40 cobs) maybe!

Well, school started yesterday here so its back to the "salt mines" for nine months again.

How is the weather in your area now?

We are getting some real cool weather now for a change.

I will close and await your reply -

As Ever
