Prof. Wood C. Babbree  
Route 1 Box 39  
Kimberly, Ida

Dear Sir!

I am sending you a little gift under separate cover, this <sup>is</sup> in appreciation for the things you done for me. I beg you to accept this from me and I will not pester you in the future. The stone axe included. Found 70 years ago on the East shore of Lake Michigan near Two Rivers, Wis at Malash Coak. You will indentify the fossilized fragments of deer horn, also Bison teeth, together with a few sea shells these fossils found along the St. Johns River here in Jacksonville which some was dredged out to deepen the river channel many years past. Sorry I had to be hospitalized and was unable to send you a Christmas gift. In my absence a number of things have got away from me so I am sending you the axe which I consider a quite good one, and I hope you accept I am giving it to you in good faith. There is just one last thing I ask of you that is a obsidian knife of that Red obsidian I need it to fill a panel of

Articles I treasure highly. The knife need not be too fine, just a straight slender blade. I know you are very busy so take your time and when you think of me knock out this article for me and please forgive me for becoming a pain in the neck for you. With kind regards and wishes of good luck to you and yours I beg to remain  
Sincerely  
Eusebio Ditcher
