Dr. Ruthann Knudson
Dept. of Soc./Anthro.
University of Idaho
Moscow, ID 83843

Dear Ruthann:

Many thanks for the kind words concerning the Casper Site. It is always much easier to do something when good data is available. Mike and I just finished the Hawken Site report. This contains Bison occidentalis with side-notched points and a date of 4500 B.C. Some very interesting things occurred there regarding reworking of points.

You might tell Don Crabtree that I do have some travel money available if he would like to come down next summer. Why don't you have him contact me?

See you in Dallas.

Sincerely,

George C. Frison, Head
Department of Anthropology

GCF/lm

Dear Don and Evelyn:

I had suggested to George that you would be an excellent resource person for the Folsom materials he'll be excavating in the Big Horn mountains this summer, up near Ten Sleep, and this was his response---might be fun. I'm in the process of asking NSF for money to subvent the festschrift volume; fingers are crossed, and Academic press is interested. Are you going to Dallas?
