

Please help me PREVENT FOREST FIRES!

May 3, 1978

Dear Don,

I have been remiss in not returning these to you sooner. I've gone over only one paper, Sur le dépeçage d'un
higène.

The amount of jargon in these papers seems to be a thick as we find in American archaeology today & they are very tough to translate. Too tough for me to do it with ease.

Since the field season is on me now I know I won't get to the other two papers for some time but I did want to return them to you.

I have enclosed a paper I've prepared while working for the USFS. It's one of my tools for saving sites from some destruction. I'll be in touch.

Sincerely

Joe Gallagher
