Dr. Charles R. Merbs  
Dept. of Anthropology  
Arizona State University  
Tempe, Arizona 85281

Dear Dr. Merbs:

I wish to take this opportunity to highly recommend Albert Goodyear as a highly qualified and dedicated student of anthropology. Albert attended the 1972 summer field school in Lithic technology which was sponsored by National Science Foundation. Of the thirty students who applied to the school, Mr. Goodyear was selected as one of five to attend which, in itself, reflect his qualifications.

Mr. Goodyear is a very dedicated and self-disciplined student and is interested and highly qualified in the field of lithic technology. He is very adept at replicating many types of prehistoric tools of various types and of various materials. As my student, I appreciated his inquiring mind and the manner in which he researched a given problem until he had arrived at an acceptable conclusion.

I would not hesitate to recommend Al to any University and feel that he would be an asset to the department.

Sincerely yours,

Don E. Crabtree  
Research Associate in Prehistoric Tech.  
The Museum  
Idaho State University
