Dear Dick:

C Thank you so much for the slides and the book, I recieved the slides but look forward to recieving the book. I am sure the slides will be put to good use. Earl Swanson is in England now but he has expressed his fond hopes of the loan of the ~~exhibit~~ exhibit, we would be more than delighted to have it for display at the University Museum. He has recently aquired more space in the Museum.

Dick about the article for the Curator I would be so pleased to have you write a draft on the exhibit and I will help in any way that I can. I do think that you should be the senior author as you are doing the lions share of the work.

O Thank you for the kind words about the Science article, I thank you and Junius again for your help, it couldent have been done without you. There# was a great response from the article, so many have asked for reprints.

I will have to take Evelyn to the clinic in Salt Lake the 16th of this month and then every three weeks, I am so inhopes that the treatments will be sucessful.

With best wishes,

Don Crabtree
