Dear Dick:

Enclosed is the application for the Explorers Club which I have signed as co-sponsor. I just talked with Junius on the phone and he said he would sign as sponsor. He asked that you complete this application and include a picture and send it all direct to him at the American Museum of Natural History - Dept. of Anthropology in New York and he will take it direct to the club.

We both want very much for you to be a member and it is just a question of procession until you are accepted.

Hope I make the meetings in Vancouver but will not plan on it unless I feel strong enough. If not, will see you and Jeff at W.S.U.

Just a reminder to send me a zerox copy of my paper "The Potential of Lithic Technology" and also the N.S.F. proposal which was turned down by the referees.

Hope everything works out well on the surgery and Evie says she will try to let you know how things are as soon as possible.

Thanks for taking my recommendation on Jeff and I assure you that you will never be sorry. If things work out, Jeff and I plan to do lots of lithic technology together and think we can make the lab at W.S.U. internationally known.

Give our regards to Phyllis and all the good people at the University.

With best wishes

Don E. Crabtree
