

THE AMERICAN MUSEUM OF NATURAL HISTORY
CENTRAL PARK WEST AT 79TH STREET, NEW YORK, NEW YORK 10024

212-8731300

June 10, 1969

Mr. Don Crabtree
Route 1 - Box 39
Kimberly, Idaho 83341

Dear Don:

This is just a quick note to let you know that the rest of your loan collection of stone artifacts has arrived here safely and in good condition, as has also the material from Idaho State University.

I am enclosing a drawing (full-size) of the Kimberley point you made along with a photograph of you making it à l' aborigine. These are for you to use in your paper if you think they will fit in. Junius is photographing the Museum's Kimberley points and his Palliaike material (along with some examples of your work) and will be sending the results to you anon.

I have just about finished my paper on the Western Desert Aborigine lithic assemblage and will send you a typescript of it as soon as it's ready. Comments and criticism will be welcome.

If you see Norman Herrett, please thank him for the pine nuts. Junius grudgingly admits they are better than dandelion greens! Have a listen to that Guatamalan marimba tape I sent him, too.

The best to you both.

Cheers,

Dick
