Museum

February 15, 1973

Dear Don:

I'm sorry you were upset by what seemed to be Wendy's slowness. I am enclosing copies of the answers she sent to both Dr. Davis and Dr. Ascher. Ascher's letter was a form letter, one of which came also to the Museum, and we delayed sending information on our own field school until we got the field flyers. Probably Wendy delayed because she may have been waiting to see what NSF would do.

Wendy has a file on field school applicants, and has answered all letters telling them the requirements. She has been using old flyers, I think.

I believe Wendy has been taking care of matters in good shape. It may be in this instance she overlooked the film inquiry (I mean Davis's). We send all those film inquiries to Dick Soltys, and also an answer and brochure to the one inquiring.

We still haven't heard from NSF about the renewal, but I do know they asked for more copies to be sent around Jan. 1st, so it could be refereed. Maybe that is why it is so slow.

Well, I hope you and Evelyn are feeling well. We went past your house in Lava last Sunday to check it, and it was still there! I sprained my ankle Saturday night, and thought the hot pools would help it (they did). There is sure one heck of a lot of snow in Lava though.

Sincerely,

p.s. We can forward all letters if that's what you want, but I think it would be easier to keep the applications here. Wendy quit, you know, and we are in the process of hiring somebody new. Wendy got a job teaching in a highschool (Minico) to fill out the term of someone who needed an operation.
