Pocatello, ID 83209

Dear Lucille:

I want to thank you so much for sending me all of the publications and also for forwarding the numerous letters. There has been such a demand for these publications recently, and I feel sometimes obligated to reciprocate because of their sending me some of their own publications. I have only one copy of Mesoamerican Polyhedral Cores And Prismatic Blades published by American Antiquity. If you can spare me additional copies of this publication, I would be most grateful.

I am sending you a check from Ferlin Edens. His address is on the check, and he would like a copy of Introduction to Flintworking. Also, he is interested in the replication of the folsom point and heat treatment. If there is additional expense, you may enclose a letter to Ferlin. I will answer his letter, and I would like to keep his letter for my files.

Do you ever get up to Lava? Unfortunately it has been nearly a year since I have been to Lava. I had another bout at the hospital for the past month, so I am still far behind in correspondence and other things. Maybe someday I will get up to Pocatello again.

I was fortunate to be able to have a nice visit with Mark Druss last month. It was a nice vacation to be out at one of the sites after so long a time.

Thanks again for everything, and I hope I will be able to see you sometime in the near future.

Your friend,

Don Crabtree, D.Sc.
