Research Associate in Prehistoric Technology
University of Idaho

Dear Don,

I'll be very happy to send you a quantity of the Eastern Michigan flint nodules.

As you may have heard on the national news 'way out there beyond the Great Divide, we've had quite a bit of winter here in Michigan recently so I'm going to wait til a bit of our snow melts off before I go venturing out for samples! Seriously, though, I'll probably be getting it for you around April or May.

At that time I'll include by letter specific details of location etc. (better than I can do with snow on the ground...)

Best regards,
