Dr. Brian Hayden  
Simon Fraser University  
Dept. of Archaeology  
Burnaby, 2, B.C., Canada

Dear Brian:

Please excuse the tardy reply to your recent letter regarding the 1976 Fall conference on lithic technology.

I will be happy to attend the conference and will act as consultant and advisor and help in any way I can. My schedule will not permit my giving a paper, but will be able to show flintknapping films if they are requested.

One suggestion - Dr. Irwin Rovner, Western Michigan University, Dalamazoo, Mich 49001 is planning a lithic technology conference on the order of the Les Eyzies conference of 1964 and this is in the offing for the fall of 1976. Would suggest that you contact him in regard to dates so that the two sessions will not conflict, as I note many of the participants are the same.

Both of these sessions are much needed and hope to attend both. Lithic technology is going a little too fast and I think we need to reassess our experiments and results.

Much success with your plans and hope to attend.

Yours sincerely,

Don E. Crabtree
