

Dear Vance;

Just a note to let you know how much Evelyn and I enjoyed  
and delicious dinner  
your visit with you and Taffy, It was one of the most relaxing and  
satisfying evenings we have had. We look forward to the time we  
can repay you ~~for~~ the hospitality.

We found the Clavos (sp) or billets in Nogales thanks to you.  
They are of ~~a~~ good hard wood and <sup>they</sup> work fine. We left one of the Mexican  
tunnips ( jicama) and a projectile point, <sup>as a billet</sup> I had in mind for you to  
show <sup>this point</sup> ~~it~~ to Mr. Mc Donald to interest him in techniques, <sup>at your home on Sunday</sup> Wish I knew  
more about his methods, If you have his adress I would like to corespond  
with him, <sup>you</sup> as after his years of work it would be regretable if it was  
lost. There are so many techniques, <sup>that</sup> one person canot perfect them all.  
I do hope you can get a lot of information from him. I ~~had~~ first heard  
of him through Joe Ben Wheat. The <sup>is</sup> point may spark his coursity.

I am leaving for the Idaho state University tomorrow to see Earl about  
the Simon Site material and will tell him of your recomendations  
Am enclosing a copy of the article sent to me by Jacques Tixier.
