

Ce.5.1.92.1

Dear Don,
Hope the New Year finds
your health improving
so you can come to
Central America again.

Remember me? You
and I had several interesting
talks at Colha and
I was the one fooling
around with the clay.
I still have those "pinch"
heads you made.

I'm going to be
working at El Mirador
this coming season
1/21 thru 5/10/80 with
Ray Matheny. It's a late

pre-classic site and I hope⁽²⁾
to see if the lithic material
is similar to what I
remember from 2006
at Colha. If you have
any photos or drawings
you could spare I'd appreciate
them. I talked to Harry
Shaper and told him I'd
be on the lookout for
similarities but I'm no
specialist & have only
the Interim Report. He
was up to his ears getting
ready for the coming season
said he had an article almost
finished that would be
helpful to me but wasn't
going to even have time
to finish that.

My address in Guatemala
is Proyecto El Mirador,
General Paliney, Flores,
Peten, Guatemala.

I'm not really in a position
to invite you to the site,
but I know Dr Matheny
would be pleased to have
you. If you feel you
could make it, there is
an airfield at the site
and we'll have use of
a Hercules carrier plane.
A formal request to
Matheny would be all
that's needed. I'd sure
enjoy seeing you.

Kathi Henry
