Mr. Julian Hayden
4239 Bellevue Avenue
Tucson, Arizona 85712

Dear Julian:

Glad you received the box of obsidian and the scrapers. Hope you can work something out for Jane with the small one. The others I sent are for you, personally, to try on wood using the flat side facing the work. By all means make Emil a bola if he wears them.

We hope to get down to the University sometime in January after the new year holidays are over. Our date is not firm due to university work and the fact that we are adding a room to our very small house and will have to stay until it is finished. However, it should be sometime after the 15th and we are looking forward to meeting you and seeing the fine staff at the department.

Al Goodyear of Arizona State University, who was a student at my summer field school, is doing some work near Ventana cave and Jane might like to get in touch with him. He is a pretty good flintknapper and is certainly interested in lithic technology.

Have a happy holiday and hope to see you next year.

Sincerely,

Don E. Crabtree
