

4239 Bellevue Avenue  
Tucson, Arizona 85712

Feb. 2, 1975

Dear Don:

Sr Manuel Robles O., Director of the Museo Regional in Hermosillo, would like very much to receive copies (reprints or Xerox) of your papers on lithic techniques. He has an enthusiastic group of amateurs, "Friends of the Museum", with which he works, and all are interested in techniques. They may be up this spring to watch Jane perform, and to look over the "alpais material in our lab.

If any of this is available, and you would be willing to send it to Manuel, I will underwrite the costs, whatever they are. And I would be ever so much obliged to you myself. Send it to me, and I will get it to Manuel.

Seems that Mexico is about to dedicate the Pinacate National Park, 4000 sq.miles of it! I've been sitting in on meetings, etc, and find it all most interesting - and have something to do with the archeological exhibits, trail displays, etc. Now, if I didn't have a business to run ----

Mrs Hayden sends her best to you both, as do I, and we do hope you are both in good health.

Sincerely,

  
Julian D. Hayden
