Dr. Henry Inwin
Washington State University
Dept. of Anthropology
Pullman, Washington 99163

Dear Henry:

Evelyn said she promised to give you the name of the doctor at the World Health Organization who is so interested in receiving literature on the typology and manufacture of stone tools. He is Dr. S.W.A. Gunn, World Health Organization, Avenue Appia, 1211 Geneva - 27 Switzerland. I am sure he would like to hear from you about your proposed project with mental health.

I really enjoyed the visit to WSU but it was altogether too short. Hope we can get together real soon. We are leaving Sunday for Glass Butte to gather obsidian for the lithic field school. Looking forward to a few days alone with the students and Earl.

Please give our thanks to Ann for the fine party she hosted. We did enjoy getting out and seeing all the people and the food was delicious.

Do hope you and Ann have a fine summer and - if possible - don't forget our invitation to visit the school during July.

Sincerely,

Don E. Crabtree
