Amherst, Massachusetts 01002

Dear Dr. Ingersoll:

I have talked with Don about the obtuse angle paper and we think it would be best to publish it first in Tebiwa. This is partly because people look for most of his papers there and partly because it is one that can be published this autumn.

If you would still like to use the paper in your collection of essays, this is all right with us. It may be less attractive to you if all of your papers are being published for the first time. Please let us know soon as I will be going on leave September 7.

Sincerely yours,

Earl H. Swanson
Director
