Dr. Jerome Jacobson
The City College
Dept. of Anthropology
City University of New York
New York, N.Y. 10031

Dear Jerome:

I am sorry that I did not have a formal paper at the meeting at San Francisco. The paper was delivered by my assistant, William Statham and we did not make copies. It was just a series of notes pertaining to various polyhedral core types rather than a merger of all Mesoamerican cores. If Bill can supply you with a copy, I sure he will send it to you. I am enclosing herewith two "Tebiwa" articles which you may find of interest.

Jerome, since you have had continued interest in lithic studies I would like to suggest that you contact Are Tsirk, 425 E. 79th St., New York, N.Y. 10021. He attended the lithic field school this summer and I feel that he has much to offer in this field. He is a very competent lithic technologist and I think you will have much in common.

I thank you for your interest and hope it continues. We need more in this field. It was good to hear from you again.

Best regards,

Don E. Crabtree
