

MUSEUM OF ANTHROPOLOGY
UNIVERSITY OF MICHIGAN

January 11, 1965

Don -

These are the notes I took at the conference, essentially as recorded except for re-grouping in the technology section. They are fairly spotty and tend to concentrate on what was new and interesting to me (e.g. I had seen and done some Levallois flaking so I merely recorded the event on p. 1). I recorded the comments on collections the same way and with the tape recorders in mind. At any rate, I hope they will supplement your own records and recollections enough to be useful. The questions in the notes are those which occurred to me as I was writing.

Yours for the perpetuation of percussion and pressure,

*I would appreciate
any corrections or
suggestions if you see
errors in view here -!*
