Mr. Donald Crabtree
Kimberly, Idaho

Dear Don:

We have just heard from Bordes that he definitely plans to arrive here about March 1st, and to stay through the end of April. In anticipation of this I am trying to collect the supply of suitable stone to keep him busy on various techniques of implement manufacture while he is here. As you probably know southern Arizona is not well blessed with cryptocrystalline rocks and it will be necessary for us to import fine material from somewhere else. The other day Bill Longacre mentioned that you occasionally received material from a commercial supplier in El Paso. Do you think it would be feasible for us to use this source and if so, could you supply me with the address and some of the details on quantity of material available, etc.?

Ray will be writing to you about the visit we hope to arrange for you while Bordes is here.

Best regards to you and Evelyn.

Sincerely,

Arthur J. Jelinek
Professor of Anthropology
