Kimberly, Idaho 83341

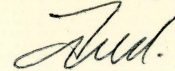

Dear Don:

Many thanks for your very nice note. We are glad that you and Evelyn enjoyed yourselves in Andover and saw some things which were new and interesting.

As we mentioned, I am sending you some of our New England quartz to play with. I hope that I have selected representative material, although now that it sits on my desk I wonder if I have included some of the really mean, crumbly stuff. You may not really be interested in this stuff and I would not blame you if you threw it into a deep, dark corner in the back yard. If you do as you should with whatever you do not want, a rock hound in the future does not know what he has in store for I think this kind of quartz is confined to the east.

With best regards to you both,

Cordially,

Frederick Johnson
Director
