Mr. Jerome Jacobson  
800 Riverside Drive  
New York, New York 10032

Dear Jerry:

Please pardon the tardy "thank you" for the India cores which David Lubbell brought when he visited at my home on his way to Edmonton. I have been at Idaho State University for the past month where we are in the process of making four films - one on the principle of the cone, one on cores, and two on pressure flaking. We have not finished the project as yet - due to weather conditions. These are outside films with the natural setting which gives us better light and certainly is more authentic. Dr. Earl Swanson was shown the India cores and is now photographing them. He was certainly intrigued with them.

If it meets with your accord, I shall bring them with me when I come to New York to visit Junius Bird the latter part of January or the first part of February. We have not as yet set up the exact date. Think this is much better than mailing them. At that time, I hope to have the opportunity to discuss these in detail with you.

Again, please excuse me for the tardy reply and the briefness of this letter, but time is so limited with this project.

Until we have time together in February.

Sincerely yours,

Don E. Crabtree
