Albuquerque, New Mexico 87106

Dear Jim:

Thank you so much for the reprint of the article published in Science on "Paleo Indian Settlement Technology in New Mexico".

You and Jerry have, indeed made an important contribution to the profession. More of this sort of approach is in order.

Just returned from two weeks in Hawaii with Goulds and Leibans. Saw some interesting material there and enjoyed talking to the students. They all seem interested in learning more of the manufacture of stone tools.

Thanks again for your thoughtfulness.

Very sincerely yours,

Don E. Crabtree
