Dear Don;

Thanks for your letter, I'm glad you got home safely + happily. I hope you are now having fun at the meetings - I decided that I couldn't afford to go - especially since I'll have to go to the AAA meetings in the fall and they're all the way out in San Diego!

All sorts of things are now happening and I'm not sure where I'll be during the summer. It looks like we may not be able to get the collections out of Chile. If not, I will have to go down here to study them. However, I could still make the school if it comes thru + if you need + NSF provides an assistant. Otherwise I will probably be out in the fall to see you - if it doesn't interfere with your plans. By that time I should have a good idea of all the problems in my collection. If I don't go to Chile, I can probably come out during the school on my own grant to help you even if NSF doesn't give you money for an assistant.

Another favor I will ask of you. I am presently working on a review of

CG.5.6.8

Jacques Bordaz' new book, Fools of The  
Old and New Stone Age and wonder if  
you would read and criticize it  
once I've finished. One question right  
now: your legal name is Don, not Donald,  
isn't it? Bordaz' illustrations of knapping  
may be slightly better than Semenov's,  
but not much - unfortunately. We need  
someone who is a good graphic artist  
to draw you from life while you have  
the tools in your hands!

I'm having trouble thinking  
straight today in case you're wondering  
why this letter is so hard to decipher.  
After all, it is May Day, and outside  
it is a beautiful May day. Therefore,  
I think I will close for now and go  
out and enjoy it.

Much love to Evalyn,

Love,

Lucy
