Dear Susanna:

Please find enclosed paper An Application of Bordes' Paleolithic Handaxe Typology to the Study of Classic Maya Lithics by Irwin Rovner. I find this a very excellent paper, but mainly for the professional rather than the lay person.

If you have space available in Lithic Technology it most certainly should be published. If not, it should be published in a journal of possibly greater circulation such as American Antiquity.

Irwin did an excellent job on his analysis and handaxe typology.

I hope you and Paul are able to continue on with your lithic experiments as I am sure Tom Hester could outline several programs of unresolved technologies at Colha.

With kindest personal regards,

Don Crabtree, D. Sc.
