

MILWAUKEE PUBLIC MUSEUM / MILWAUKEE WISCONSIN 53233 / BROADWAY 1-6810

February 5, 1970

Dear Don:

I have finished my analysis of the artifacts from the Gull Lake Site in Saskatchewan and have returned the specimens with the exception of about 4 Avonlea points that I told them would be sent to you for comments on manufacturing techniques. A couple years ago, you said that you would be willing to look at these if I sent them on to you. Can I mail them to you at the above address or to Dr. Earl Swanson at Pocotello. Which would be more convenient?

We had the pleasure of spending 100 days with Dr. Bordes on an INQUA tour last summer. Alice and I were digging at Solutre during the early part of the summer and got in on the INQUA Congress later.

Sincerely yours,

*Tom*
