

MILWAUKEE PUBLIC MUSEUM / MILWAUKEE WISCONSIN 53233 / BROADWAY 1-6610

June 14, 1970

Dear Don:

The six Avonlea points and the letter regarding them arrived today. I was very pleased to get this information on them and appreciate your spending the time in looking them over. I was aware of the basal grinding and was quite interested in your explanation for it. I was also interested in your item 11 that they were heat treated. I shall look for a grinding remnant on the lateral edges when I can get to a binocular microscope.

Because of the local interest in Avonlea points, I thought that the Saskatchewan Archaeological Society might like to use your letter in their Newsletter so I am sending a copy off to Gilbert C. Watson, the Editor. If you have an objection to having the letter appear in the Newsletter drop Watson or me a quick note. Alice and I are going to Lima, Peru to the Americanist Congress in August and plan to stop by and see Lee Parson's dig in Guatemala. Give my regards to Earl.

Sincerely yours,

Pom
