Mr. Donald E. Crabtree  
Idaho State University Museum  
Pocatello, Idaho 83201

Dear Mr. Crabtree,

I am a graduate student at N.Y.U., working under the supervision of Dr. Howard Winters. At present, I am conducting experiments involving the effects of heat treatment on chert and flint. I am aware that you have worked in this area, and would deeply appreciate it if you could supply me with any pertinent data in regards to methodology, materials, and of course, results, that you might have.

I am also attempting to contact as many people as possible who have worked, or are currently working in this area. I hope in this manner to be able to establish some sort of co-operating network. If you know of anyone, I would appreciate your passing their names on to me.

Thank you for your cooperation. Hoping to hear from you soon.

Yours truly,

Joel I. Klein

P.S. If possible, I would appreciate a reprint of your article which appeared in Tekwa in 1964.
