University of Kansas  
502 Dyche Hall  
Lawrence, Kansas 66045

Dear Paul and Susanna:

Thank you so much for your letter of Sept. 21st. Your letter and suggestions for the field school was fine and has been submitted to Dr. Swanson.

I am glad that you and Susanna are continuing to break rocks and have now found some good material sources. Have you tried heating some of the stone for pressure flaking?

Time at the field school went so fast this Summer that I did not get to spend nearly enough time with you. You will just have to pay us another visit in the future.

If there is ever anything that I can do to help you with your projects please feel free to call upon me. Evelyn and I send our best regards to you both.

Sincerely yours,

Don E. Crabtree
