Mr. Norman Kotker
597 Fifth Avenue
New York, N.Y. 10017

Dear Mr. Kotker:

Pursuant to the telephone conversation of my wife and yourself, I am enclosing herewith revised acceptance letter for the article on Stone Technology. Hope this meets with your needs and approval.

It was very nice to have Francois Bordes as our house guest for a week and we both took the opportunity to discuss our contributions to the dictionary. For your information, he is now at the University of Montreal, should you need to contact him for any reason.

Thank you again for giving me the opportunity to contribute something on stone technology - a much neglected subject in archaeology.

If the enclosed does not meet with your requirements, please retype and send for another signature.

Yours sincerely,

Don E. Crabtree
