Sidney Smith Building  
University of Toronto  
Toront - 5 - Ontario, Canada

Dear Dr. Kikan:

Thank you so much for sending the package of flint which you received from Jacques Tixier. You are most fortunate to have worked with Jacques and I am sure it was a rewarding experience.

The package arrived in good condition. I could hardly wait to pressure flake some of the stone. I find that it works well without thermal alteration.

We hope to see Jacques in Calgary but have been unable to find out if he plans to attend the session there in November. His presence is all that would entice me to go there at that time of year.

Thanks again to you and Jacques for adding this superb material to my collection.

With best regards,

Don E. Crabtree
