Dear Ruthann:

Am enclosing a letter from Henry Wylie of University of Utah which is self-explanatory. Since I was not at Miami, I feel that you can best answer this letter. Since you are also well versed in functional analysis, I thought you also might want to contact this man.

I hope that you had a very happy Christmas and that the New Year will bring you happiness and a PhD. Please give our regards to all the fine people in the department there and hope Henry has recovered from his bout with the flu.

Hope to make the meetings in San Francisco and have a chance to talk with you there. Hester has a panel on technology going but could not give him a definite answer for we may go to London in May if our health permits.

Thanks in advance for answering this letter and all the best for the coming year.

With best wishes,

Don E. Crabtree
