To Don

From Ruthann

Subject WSU flintknapping school

University of Idaho

Inter-Office Memorandum

Date 10 March 1977

Have you seen this announcement? If not, I thought you might like to have a copy, and you might like to mention to Jeff sometime that your name is a bit awry. Also, if it is all right with you, I think we in the lab would appreciate it if you would ask Jeff to identify you as a research associate of the University of Idaho Laboratory of Anthropology--I think it would announce to others your professional affiliation a bit more broadly.

I'm off to Vancouver, and will get you copies of my papers when I get back; they are at the printers now and I will pick them up just as I go out the door. I can't read the obtuse angle paper at the conference, as there will not be any papers read there---they have all been turned in and will be read by all participants, but then just a subject for discussion and not read. Plus, yours is already published. However, I will be more than glad to insert comments about the paper, and its availability, where appropriate, and I have cited it in my own paper. I'll give you a full report when I get back, and am planning on seeing you in Twin Falls in a few weeks,

Carl Kilsgaard says hi.
