Miss Ruthann Knudson
Washington State University
Department of Anthropology
Pullman, Washington 99163

Dear Ruthann;

Congratulations on your forthcoming marriage! Ray is a fortunate man.

Time just permits a brief reply, but saw Swanson last week and talked with him about your attending the field school. Did not get a definite "yes" but it looks good and will be looking forward to working with you.

I would be delighted to have some knife river flint both for my experiments and for the school. Good flint is difficult to come by in the western United States. Please send it C.O.O. Motor Freight to Twin Falls, Idaho % of Don E. Crabtree, above address and phone number. A convenient way of packaging for shipping is to use two burlap bags (one inside of the other) for it is so much easier than boxing. Will look forward to working some and also trying the thermal alteration.

Give my regards to Dick and Jeff and all the good people in the department and hope we can get together this summer.

Best wishes,

Don E. Crabtree
