March 2, 1971

Dear Don:

I am presently sitting in Calgary, working over the Fletcher site collection after a weekend at the Canadian Archaeological Association meetings. During the sessions I talked to both Jeff Manger and Carl Zagan (sp?), & they said you would be holding the Flint Knapping session again this summer. Correct? If so, I would definitely like to have my 1970 NSF commitment renewed, if I may.

The whole winter has been complicated by a broken foot & toe-to-knee cast since Thanksgiving, but I am still managing to hobble around. I have done some work on the Colorado Eden sites since September (the very little), but the real work has been since February 1. The WSO Graduate School kindly funded a trip to Texas for me, and I spent three weeks in Texas doing an attribute study of the lithics from Plainview, Bonfire Shelter, & the diagnostics from Red Smoke. I want to go back for Milnesand & Blackwater Draw next fall, if for sure. Needless to say, I've learned a fair amount about lithics over the past year, but know I have only scratched the surface. Spending time with you is becoming a vital necessity.

I will be in Pullman next week, March 7-12, and would appreciate it if you could drop me information on the summer session there (Dept of Anthro, WSO). If not, please send it home, as I shall be there soon after — 1860 Athens, #2; Boulder, Colo. 80302. My summer plans are wide open at the moment, and I would definitely like to spend part of the time in Idaho. Please say hello to Evelyn for me.

Sincerely,

Ruthann Knudson
