Mr. Don Crabtree
Department of Anthropology
Idahao State University
Pocatello, Idaho
U.S.A.

Dear Mr. Crabtree:

I was wondering if you could give me some information about when your workshops are being offered in lithic technology and experimental replication.

My background in this area is rather weak, having concentrated mainly on the functional end of analysis. For this reason I would be very interested to learn from you the essentials of stone working.

Last year I was fortunate enough to be able to spend the year in Dr. Semenov's laboratory in Leningrad, and I would like to tell you what high regard he has for you and your work. In his lab, the only decorations on the walls (besides experimental collections) are the pictures of you from some of your films on stone working. Both he and the coworkers in the lab all hold your work in high esteem, and he asked me to send you his regards.

I look forward to hearing from you and hope it will be possible to take your course in stone working.

Yours truly

Jeff Levitt
