Mr. Don E. Crabtree
Route 1
Kimberly, Idaho 83341

Dear Don:

Many thanks for your good letter and for sharing François's wonderful letter with me. I will drop him a letter to assure him we do not train Grasshoppers during our summer!

We are now out from under the rush of beginning our semester and I am getting some things done. We are beginning the processing of all the Grasshopper data and photos, etc. As soon as we can get prints out of our very slow Museum dark room, we will send you people a set. These will include ovens!

I would like to hear more about the new technique for making micro-blades. Sounds most interesting.

Bion Griffin is still most excited by, and interested in your work. I think he will be a fine student for you to work with, and I know he is greatly looking forward to seeing you people again.

Needless to say, I am also looking forward to seeing both of you this winter. I hope you will allow several days in your schedule to visit me here in Tucson. I have plenty of room in my house and an inexhaustible supply of good cheer and enthusiasm to share with you both (I can't promise a bear this time, however!).

I was sorry to learn that Vance Haynes was too busy to read your paper. I'm afraid that I probably won't get the chance to convey your regards and apologies to him as he is too busy usually to spend much time listening to me. . .

Many thanks again for your letter. I look forward to your next one. And thanks, again, for your article on the Folsom material; it was both clearly and well written!

As ever,

Bill
